

FCX — Formula-Coordinate Explanations of the TRACE-PD models

**C1 · Implied exam
what moves the classifier,
split by formula channel**

**C2 · Why is the set {TD, PIGD}?
straddle reproduces the set 80% ($\kappa = 0.60$);
but 'always tremor' beats per-patient blame**

**C3 · What transition risk is made of
cheap-feature model: AUROC 0.53,
surrogate R^2 0.17**
